I have spent years playing, tweaking and reworking my art to get to something I am proud to make and share. It has been a fun but frustrating process at times, although the final product has surpassed my expectations. The following methods are the foundation to my artwork. There are so many things you can create using these techniques. Experiment. Have fun with it. The best part about this process is that if you “mess up” you can always start again using the same piece (although I believe there are really never mistakes when making art). This book focuses specifically on the techniques step-by-step. I like my books short and to the point, and I strive to give my readers the same no-fluff reading experience. I hope you enjoy the techniques in this book and I wish you many hours of happy crafting!
