

Does America Need a Foreign Policy?: Toward a New Diplomacy for the 21st Century

In this timely, thoughtful, and important book, at once far-seeing and brilliantly readable, Americas most famous diplomatist explains why we urgently need a new and coherent foreign policy and what our foreign policy goals should be in the post-Cold War world of globalization. Dr. Henry Kissinger covers the wide range of problems facing the United States at the beginning of a new millennium and a new presidency, with particular attention to such hot spots as Vladimir Putins Russia, the new China, the globalized economy, and the demand for humanitarian intervention. He challenges Americans to understand that our foreign policy must be built upon Americas permanent national interests, defining what these are, or should be, in the year 2001 and for the foreseeable future. Here Dr. Kissinger shares with readers his insights into the foreign policy problems and opportunities that confront the United States today, including the challenge to conventional diplomacy posed by globalization, rapid capital movement, and instant communication; the challenge of modernizing China; the impact of Russias precipitous decline from superpower status; the growing estrangement between the United States and Europe; the questions that arise from making humanitarian intervention a part of the New Diplomacy; and the prospect that Americas transformation into the one remaining superpower and global leader may unite other countries against presumed imperial ambitions. Viewing Americas international position through the immediate lens of policy choices rather than from the distant hindsight of historical analysis, Dr. Kissinger takes an approach to the countrys current role as the worlds dominant power that offers both an invaluable perspective on the state of the Union in global affairs and a careful, detailed prescription on exactly how we must proceed. In seven accessible

chapters, *Does America Need a Foreign Policy?* provides a crystalline assessment of how the United States ascendancy as the world's dominant presence in the twentieth century may be effectively reconciled with the urgent need in the twenty-first century to achieve a bold new world order. By examining America's present and future relations with Russia, China, Europe, the Middle East, Africa, Latin America, and Asia, in conjunction with emerging concerns such as globalization, nuclear weapons proliferation, free trade, and the planet's eroding natural environment, Dr. Kissinger lays out a compelling and comprehensively drawn vision for American policy in approaching decades.
