

Remember how excited you felt the first time you looked at the moon through a telescope? How you wanted to scan the sky and see what other hidden gems were hiding in the darkness? Now imagine that you were not welcome or allowed to look through the telescope. Millions of people are denied this opportunity because astronomy facilities are not accessible to them. This book provides strategies and resources to remove barriers and make observing sessions welcoming and accessible for people of all abilities. If you are an astronomy educator, you can help make the universe accessible! And if you are an astronomy enthusiast, use this state-by-state guide to find accessible destinations.
