**LEP (limited English proficient)
to have better treatment**

Today, with the advance of globalization, we see many foreign residents in Japan. We are now facing tasks - fostering medical interpreters, developing a system to accept foreign patients in medical institutions and etc. those need to be solved immediately. We joined hands with Gunma University School of Medicine for medical interpretation, and based on that know-how, we now e-published Multilingual Medical Questionnaire- a multilingual medical support system that can be used on smartphones and iPad. This system is developed on the idea of helping patients who have language barriers for better communication. We will release selected categories of support system, such as For Nurse in the near future. We hope Health Life Series meets your expectations. Director Kiyomi Takizawa
