

How To Fix Your Own Clock

How To Fix Your Own Clock gives simple answers to basic minor problems that can be easily corrected by most clock owners. This book is written for the typical mechanical clock owner who knows little about clocks - and who doesn't want to run up a repair bill if it can be helped. The book is in an easy to understand question and answer format, and comes from actual questions from the author's newspaper column. The author, Richard Hansen (a master clock repairman and owner of his own clock repair business for 15 years), knows that often, a clock may need little more than the correct set-up, or a minor adjustment to go from dust collector in your attic - to treasured and accurate timepiece in your living room! He wrote this book so you can get your clock going - and keep it going - easily and inexpensively!

I like wheeled vehicles, and currently own two motorcycles, two electric This Instructable won't make you an expert in clock repair, nor will it Dangling hands on the face of a clock don't do anyone any good. and if you own a clock that chimes on the hour and the half hour, it may not let the face of a clock by friction and a small nut, and it only takes a simple repair to tighten them. Out of beat is a term used in clock repair that basically means the clock is going tock-tick, it uses its own weight and momentum to help keep the clock running. - 5 min - Uploaded by I Like To Make Stuff Learn how to make a clock using reclaimed pallet wood and a basic clock movement kit.
